

CI  
B1

processed result performed by said processing unit and a display unit which displays the account data stored in said memory unit as a household account book, wherein said displaying unit displays the respective account data inputted from said plural input units and the account data entered in said memory unit as the household account book and said processing unit includes an overlap judgment unit which judges an overlap between the respective account data displayed on said display unit and the account data entered in said memory unit as the household account book and stores the account data into said memory unit based on the result of the overlap judgment.

Sub  
C2

B2

8. (Twice Amended) A household account book management system in which a plurality of terminals are connected via a network and at least one terminal includes a household account book management apparatus which displays account data inputted via the network as a household account book, wherein said household account book management apparatus includes plural input units which input a variety of account data, a processing unit which processes the inputted account data, a memory unit which stores the processed result performed by said processing unit and a display unit which displays the account data stored in said memory unit as a household account book, wherein said displaying unit displays the respective account data inputted from said plural input units and the account data entered in said memory unit as the household account book and said processing unit includes an overlap judgment unit which judges an overlap between the respective account data displayed on said display unit and the account data entered in said memory

C29  
unit as the household account book and stores the account data into said memory unit based on the result of the overlap judgment.

---

Please add the following new claim:

---

B<sup>3</sup>  
--9. A household account book managing apparatus according to claim 3, wherein at least one of said plural input units receives account data from the outside of said household account book managing apparatus via a network.--
